

JORDAN ELLIS

Austin, TX | 555-123-4567 | jordan.ellis.data@example.com | github.com/jordanellis-data

Professional Summary

Results-driven MLOps Engineer with 4 years of experience building and deploying machine learning systems across healthcare and retail/e-commerce, seeking to leverage expertise in AWS SageMaker and Python to drive scalability and efficiency in Experian Health’s revenue cycle challenges.

Education

Fictional State University <i>M.S. in Data Science, GPA 3.8/4.0</i>	Austin, TX May 2022
Northbridge University <i>B.S. in Statistics</i>	Denver, CO May 2020

Experience

Data Scientist <i>Meridian Health Analytics</i>	Jun 2022 – Present Austin, TX
- Developed and deployed a patient readmission risk model (XGBoost, SHAP) that achieved 0.81 AUC on held-out data, demonstrating expertise in predictive modeling and collaboration with clinical stakeholders. - Streamlined model retraining processes by designing feature pipelines over EHR and claims data in SQL and Python, reducing turnaround time from two weeks to three days and improving overall efficiency. - Presented model performance and risk findings to clinical stakeholders and mentored two junior data analysts.	
Data Science Intern <i>Northlight Retail Co.</i>	Jun 2021 – Aug 2021 Denver, CO
- Prototyped a collaborative-filtering recommendation model for the online product catalog, evaluated via offline A/B simulation. - Cleaned and joined multi-source sales and clickstream data to support the personalization team’s feature backlog.	

Projects

Patient Readmission Risk Predictor <i>Tech Stack: Python, XGBoost, SHAP, SQL</i>	2023 Healthcare
Predicted 30-day hospital readmission risk from EHR and claims data, using SHAP to produce clinician-facing explanations for each score; piloted with a regional hospital network.	
E-commerce Product Recommendation Engine <i>Tech Stack: Python, PyTorch, Embeddings, Redis</i>	2022 Retail / E-commerce
Built a hybrid collaborative-filtering and embedding-based recommender served behind a low-latency Redis lookup layer, lifting click-through rate on recommended items by 14% in an A/B test.	
Customer Support RAG Chatbot <i>Tech Stack: Python, LangChain, Pinecone, OpenAI API</i>	2024 Retail / E-commerce
Built a retrieval-augmented generation chatbot over product manuals and policy documents, cutting average tier-1 ticket handling time by 22% in a pilot rollout.	

Skills

- Languages:** Python, SQL, R
- ML & Data:** PyTorch, TensorFlow, scikit-learn, XGBoost, Pandas
- Systems & Tools:** AWS SageMaker, Databricks, Docker, Git, LangChain
- Additional (aligned with this role):** Lambda, MLflow, TensorFlow Serving
